## MINI FUNNEL For the Noviomagus Mini Mill

Spierings Orthopaedics developed a special funnel in order to make the milling of bone during maxillofacial and spinal surgery easier. Simply place the Mini Funnel on top of the Noviomagus Mini Mill for convenient placement of bone fragments in the Noviomagus Mini Mill. The Mini Funnel is fully autoclavable and is designed to last.

For more information on the Noviomagus Mini Mill or other products from the Spierings Orthopaedics Portfolio, please visit the Spierings [website](http://www.spierings.biz).

### Collaboration

The Mini Funnel is developed in close collaboration with our Swedish partner Dardel Medical.

Don't hesitate to contact us if you think Spierings can help you in the development of your product.
